CAREER SUMMERY

Java Developer with 3+ years of experience in building scalable web applications and microservices using Spring Boot, Spring MVC, and Hibernate. Strong in REST API development, database integration, Agile/Scrum delivery, and CI/CD automation. Skilled in debugging, performance optimization, and delivering secure, high-quality solutions.

Education

09/2017 – 04/2021 **Bachelor of Science**
Mahatma Phule Krishi Vidyapith, Rahuri

PROFETIONAL SKILLS

Java 8,11,17
MICROSERVICES
Spring MVC
Hibernate
Docker
CI/CD
GIT/SVN/Gitlab
Apache maven
STS/Eclipse
OOPS
SPRING BOOT
REST API
Jenkins
MS SQL
JIRA/REDMINE/Zoho
Intellij IDEA
PostgreSQL

Professional Experience

06/2024 – Present **MAS FINANCIAL SERIVICES LTD**

03/2023 – 06/2024 **E-PROCUREMENT TECHNOLOGIES PRIVATE LIMITED**

PROJECTS

Branch Rule Engine
Branch Rule Engine is a financial domain project developed to automate and streamline **credit eligibility evaluation and risk assessment** across branch-level operations. The platform integrates five core modules — **ITR, Banking, GST, CIBIL, and Rule Engine** — each responsible for validating, analyzing, and scoring financial data from multiple sources. The system centralizes borrower profiling, applies predefined scoring criteria, and generates automated decisioning outputs to improve loan processing accuracy, reduce manual intervention, and accelerate credit approvals

PANAYA, Tea-Board, PRAJ.
Led the successful implementation of an end-to-end **Procurement System** featuring **e-Auction** and **e-Tender** modules for a major government agency. The solution was designed to modernize and digitize procurement workflows, enabling transparent vendor onboarding, competitive bidding, and automated evaluation of tenders. The platform enhanced operational efficiency, improved auditability, and promoted fairness by enforcing rule-based tender processing and real-time auction monitoring

Roles and Responsibilities

- Serves as the technical expert on development projects.
- Producing and consuming the restful web services.
- Built dynamic forms and dashboards using React JS/TS for branch-level users.
- Requirement analyse, design, coding and testing etc.
- Bug fixing
- Analyse the program to identify the code changes as per the business requirements.
- Involved in knowledge sharing activities with team.
- Preparing the technical specification document based on existing system and new design changes.
- Minimizes risk, prepares for risk mitigation, keep the project on track.
- Manages user requirements; provides timely project updates.

INDUSTRY EXPERIANCE

- 2.10+ years of experience in Java development, building scalable web applications and microservices using **Spring Boot**, **Spring MVC**, **Hibernate**, and **RESTful APIs**.
- Hands-on experience in **software analysis, debugging, testing, and implementation** following Agile/Scrum methodologies.
- Proficient in designing and developing **Java EE components**, integrating backend services, and implementing authentication/authorization using **Spring Security**.
- Experience in creating and consuming **REST APIs**, implementing **Swagger / OpenAPI** for API documentation and integration.
- Worked on **Jenkins CI/CD pipelines** to automate build, test, and deployment processes for Spring Boot applications.
- Experience with version control tools like **Git, GitLab, and SVN**, including branch management and repository maintenance.
- Knowledge of **Docker** for containerizing Java applications and microservices.
- Strong understanding of **Java Collections, Exception Handling**, and design principles.
- Hands-on working experience with **MySQL, PostgreSQL, and MS SQL Server** (queries, joins, indexing, stored procedures).
- Participated in **code reviews**, unit testing, and enforcing coding standards and best practices.
- Worked with development tools like **Eclipse, STS, IntelliJ IDEA, Maven**, and **Postman**.
- Experience documenting technical deliverables including **User Manuals, API Guides, Developer Documentation, and Release Notes**.
- Implemented Webhooks and automated builds for **full-stack deployments (React + Spring Boot)**.
- Strong debugging skills with ability to identify root cause and resolve production-level issues quickly.
